Quality. Service. Innovation.

Over 70 Years of Building Value Into Building Products

For many years, ODL's corporate mission has been Building Value into Building Products. We also believe our purpose is to build value for your business by making products that improve your customers' homes, from providing privacy to adding a beautiful touch to an entryway.

We're committed to building value through innovations in materials and manufacturing processes. In the 1970s, we embraced a new technology as we shifted from producing wooden frames to producing injection-molded frames—an innovation at the time. ODL continues to keep its sights on what is ahead.

We also build value into our products through research and design. From the introduction of our TriSYS® frame system in 2010 to the inventive and beautiful Dialogue Layered Glass line in 2018, ODL researches trends and technologies to produce products for the times—and sometimes designs that push the times.

But we build value into more than just our products. We are committed to excellent service, defect-free products, and on-time delivery so that you can confidently represent ODL. A 20-year warranty on our glass seals is evidence that we stand behind the products we make—and so can you.

ODL has specialized in doorglass for over 70 years, and we've grown to be a worldwide leader in the doorglass industry with a reputation for high-quality products and high-quality service. Every day, we work hard to earn that reputation. That is how we will continue to build the products that build value for your business.

Dialogue Layered Glass™

We Know Doorglass

This is what ODL does.

Our experience is evident in the quality of handcrafted glass, cut and shaped in a range of styles to match a diversity of home owner's design preferences across the country. ODL's experience is also reflected in the quality of doorglass construction: two panels of tempered safety glass, insulated for air- and water-tight performance. When you look at any one of our decorative doorglass products, you see a cohesive design, but many individual elements come together to create that design.

Light & Privacy Levels

Each doorglass design varies in the amount of light it transfers and privacy it affords. We assign a numerical privacy level to each doorglass, from a 0 for low-privacy transparent glass to a 10 for high-privacy opaque glass.

Privacy Level = 8

Price Level

Homeowners can also select decorative doorglass in a price range that suits their budget. Four levels, from the higher range Group A to the lower range Group D, are offered based on doorglass design and materials.

Low-E Doorglass

Available with a hard coat finish.

Low-E + Doorglass

Available with a soft coat finish.

ENERGY STAR®

Helps meet ENERGY STAR® requirements when used with an ENERGY STAR® qualified door or sidelight.

Severe Weather Doorglass

Families shown with this icon have sizes available in Severe Weather Doorglass.

Glass Textures

The texture and surface of handcrafted glass offers you aesthetic elements such as depth, dimension, and contrast. It also contributes to light and privacy levels. These are the glass textures currently offered in our decorative doorglass designs.

Finishes

Doorglass finishes, also known as caming, refer to the metal work that joins together the glass elements. Finishes are an important consideration, as they contribute a good deal of the visual style of your doorglass design. We offer a wide selection of finishes for each design to give homeowners options for matching door hardware, light fixtures, or interior furnishings.

Shapes, Sizes and Configurations

Our doorglass designs are offered in several sizes from a partial-view to a full-view glass door. We also offer sidelight and transom glass. A selection of shapes, as well, offers plenty of options to meet your design preference and amount of natural light you're looking for.

Decorative glass is handmade by skilled craftsman, and it is subject to variation. Each piece of glass is cut and individually positioned into the caming to create the decorative design. In the tradition of decorative glass creation, glass fits into the caming but is not cemented into the caming. Therefore the decorative glass panel is subject to some movement and sound (usually more of a "tinkling" sound); this is not considered a defect.

Dialogue Layered Glass™

Playful interaction and dynamic privacy

Dialogue takes on a personality of its own as layers of glass interact with one another, with light, and with movement. Each of the line's six ceramic frit patterns change form and move as light or a person's vantage point changes. Patterns come to life, shapes are revealed, and shadows dance as light and movement engage in a dialogue with the glass. Dialogue layered glass creates dynamic privacy that changes, just as the doorglass patterns do, with light and proximity.

Subtle beauty and a surprising twist

Dialogue complements a range of architectural styles and design aesthetics with doorglass patterns offering privacy and translucence. Ayako Takase and Cutter Hutton, principals of industrial design firm Observatory, created each of Dialogue's designs with an etched, subtle pattern on the outer glass layer that allows the home's architecture to take center stage while the interior layer features a bolder, pronounced pattern.

Designers Ayako Takase and Cutter Hutton

686-BNT | 694-CL

Banter Layered Glass

Banter's small-scale pattern of overlapping diagonal lines creates a woven design that zig-zags across layers of doorglass. From a distance, the fine "threads" give the appearance of fully frosted, textured glass that provide a low-medium privacy range.

Ceramic Frit Layered Glass

Dynamic Privacy Level

Model 800 series Craftsman frames are a flat profile that is different from the traditional profile. Please note this when matching with sidelights.

686-BRS | 694-CL

Brainstorm Layered Glass

Appealing to both mid-modern and modern design sensibilities, Brainstorm's exterior vertical pattern and interior chevron motif combine for an appearance with both subtlety and substance. Brainstorm layered glass has a medium to medium-high privacy range.

Ceramic Frit Layered Glass

Destination Doorglass Collection

Your destination.

A place you want to be.

A place that puts you at ease.

A place that draws you to it.

Though trends in home design change over time, one thing stays the same: A person's home is their sanctuary. It's the place where you can shake off a busy day, relax with a book, and welcome family and friends; where you are surrounded by things that make you feel good, that reflect who you are. Home is the place you want to be, your favorite destination.

Destination doorglass for entry doors makes coming home just a little nicer.

ODL's Destination line reflects the trends we are seeing in home design and entry door/doorglass preferences. Four doorglass styles have higher levels of privacy, and each offers a unique minimalist design. Unique because your home and your style are your own. Just like the destination that draws you to it.

What does your destination look like?

Spotlights® Doorglass

Authentic Design for the Architecture Enthusiast™

Trends come and go. Good design lasts. As do good memories. Of homes you grew up in. Of architectural styles you've admired. Spotlights doorglass, from ODL, celebrates the best of your design history.

Put the spotlight on...your style, your price, your architectural expression, your entry door, your home.

Architectural style is what gives a home character. The charm of bungalows. The geometric patterns of mid-century minimalism. History revisited in Georgian revivals and Colonials. The horizontal stretch of ranch homes and the vertical stack of bi-levels and tri-levels.

Because you're inspired by your home's architecture or the vision of the one you're building, Spotlights doorglass is for you. It's the finishing touch for the discerning homeowner who appreciates architecture and the spirit of good design.

Fit the Bill

Spotlights gives you options that make it easier to meet your renovation and construction goals. Five doorglass sizes and seven glass options give you flexibility to create a unique look that complements the architecture of your home. Small and large glass sizes, horizontal and vertical shapes, and choices for the number, orientation, and type of glass give you plenty of flexibility for exactly the style, privacy, and price you desire.

Heighten the Performance

Spotlights is constructed with performance features that style-savvy homeowners look for. Spotlights' FiberMate® molded and textured frame works equally well for painting or staining. FiberMate's material formulation out performs lesser quality frames: the frame's construction resists both warping and deformation from heat buildup and can be used with dark finishes.

Spotlights' compression foam tape seal construction eliminates the oozing and sticky mess of wet caulk products. The frame seal's design is also engineered to extend the life of your door frame. If damaged doorglass needs to be replaced, you can do so without having to replace the frame as well. The modern Spotlights frame with compression foam tape seal is removed from the door, damaged glass repaired or replaced, and the frame reinstalled. Insulated glass and a well-constructed frame unit make Spotlights energy efficient.

Seated screw hole covers allow for easy alignment and match the frame's grain direction, resulting in a uniform, finished aesthetic.

Keep It Real

Spotlights are true to the character of your home's aesthetics. Circuit, Clear, Clear Low-E, Cubed, Frosted and Rain glass; perforated metal Chain Link inserts, and an architecturally authentic modern frame profile create the minimalist aesthetic and functional attributes you're wanting in your home.

The textured grain in Spotlights' frames is reminiscent of classic mid-century maple and birch furniture. The uniform and subtle grain provides a perfect surface for paint or stain.

Perspectives Textured Doorglass

A view. A viewpoint.

A city skyline.

An attraction to cultural artifacts.

A swirl of clouds.

A cosmopolitan sensibility.

A colorful marketplace.

An appreciation for tradition and trends.

The front door of your home. A perspective of what lies beyond.

ODL considered views and viewpoints from around the world as we designed our Perspectives line. Textures, colors, patterns, terrain, objects, cultural influences—all led to this diverse collection of privacy glass styles for your entry door.

Madison

Doorglass Design

Renowned Craftsman architect Frank Lloyd Wright advocated that architecture should become one with its surrounding landscape. The Craftsman-inspired design of Madison's geometric pattern and its nickel vein wrought iron finish will fit the "landscape" of your home and complement the special touches you've given it. Madison provides a high privacy level.

Old World Style Doorglass

Historical motifs translated for today.

This collection features a number of designs that will blend beautifully with the old world architecture of your home.

An appreciation for the aged and elegant, for the beauty of raw materials shaped into fine forms in the hands of skilled artisans. For homeowners who prefer wrought iron and rich patinas over highly polished finishes and ornamental scrolling over geometric patterns.

Enclosed Blinds Color Collection in Espresso

686-RLB-ES

Enclosed Blinds Color Collection

In keeping with ODL's attention to style and design, we are introducing four NEW colors of Enclosed Blinds: Sand, Espresso, Slate Gray, and Silver Moon. With matching privacy channels and operators, the colors of your entry door blinds will always coordinate with your décor. The collection is available in Evolve® frames which provide superior rigidity and eliminate bothersome squeeze out using our dry glaze seal.

Light and Privacy Control

You can close your blinds for complete privacy and security or open them up to enjoy the outdoors—and every level in between. The levels of light and privacy are yours to control using our easy operator. The full privacy channels eliminate light gaps, shadows, and sunlight glare. The NEW colors are offered with Low-E + glass and can meet ENERGY STAR® requirements when used with an ENERGY STAR® qualified door.

Low Maintenance

Since our blinds are enclosed between two panels of glass, you never need to dust which decreases allergens. Even with repeated use, our Enclosed Blinds retain their new look, unlike exposed blinds that can become bent or tangled over time. ODL Enclosed Blinds carry a 20-year warranty on blinds, glass seal and operator for a long-term performance in your exterior door.

Raise, Lower & Tilt—No Dusting!

Blinds lower neatly within full privacy channels to eliminate light gaps.

Safety

ODL is leading the industry in enclosed blinds that reduce the safety risk for children and pets. Because our Enclosed Blinds do not have dangling cords, they have received two certifications.

WCMA's "Certified Best for Kids" designation and Parents for Window Blind Safety (PWBS) Seal of Approval.

Both organizations strongly urge parents to use window coverings without accessible cords in homes with children. In addition, all of our Enclosed Blinds are offered in tempered safety glass.

Easy to Operate

The ergonomically placed single* operator lets you raise, lower and tilt your blinds the entire length of the doorglass with only the slightest movement. No reaching or stooping is needed to adjust the blinds. An innovative design results in stacked blinds that take up the smallest of space at the top of the door glass when fully opened.

* Due to the size and weight of the blinds, the 80" blinds have a dual operator that controls the raise, lower and tilt function.

Enclosed Blinds Color Collection espresso, sand, silver moon, or slate gray

Light-Touch Enclosed Blinds
686-RLB

Light-Touch®

Enclosed Blinds

Maintenance-free option for controlling levels of doorglass light and privacy.

Enclosed blinds mean no dust or dirt, no kinks or dents, and no banging of the blinds when you open and close your door. A cordless design is a safer solution when children or pets are in the house. Light-Touch® blinds are designed and engineered to be used day in and day out. We've tested them for more door slamming (50,000 times) and adjusting (10,000 times) than your average household use. The glass seal is warranted for 20 years.

Raise, Lower & Tilt—No Dusting!

Blinds lower neatly within full privacy channels to eliminate light gaps.

Uniform color in components provides a clean aesthetic look.

Ergonomic design principles place fingertip control within easy reach.

Relax: Light-Touch® fully enclosed blinds give you a maintenance-free option for controlling levels of doorglass privacy. A single control lets you raise, lower, or stop anywhere in between, and tilt for full privacy, no privacy, or anything in between. Light-Touch blinds provide full coverage of your doorglass, so sunlight, moonlight, and streetlights stay out—unless you invite them in.

- The single operator lets you raise, lower or tilt the blinds in an easy slight movement.
- Blinds adjust for complete light block, and the privacy channels on each side eliminate light gaps when the blinds are closed—no street light shadows or sunlight glare.
- More privacy at night and increased sense of security.
- Available in Tan or White blinds.

Energy Efficient

Light-Touch blinds and frames come in tan or white. Frames can be painted or finished to complement door and home finishes. Most Light-Touch blinds are offered with a Low-E glass option. Light-Touch blinds help meet ENERGY STAR® requirements when used with an ENERGY STAR® certified door or sidelight.

Triple-Glazed Enclosed Blinds
686-CGBG-BLD

Triple-Glazed Enclosed Blinds

With Grilles Between Glass

The triple-glazed design suppresses traffic sounds and other unwelcome noises with a STC rating value of 34*. Triple-glazed design also reduces heat transmission by up to 28%. All triple-glazed doorglass is offered with a Low-E glass option.

**STC = Sound Transmission Coefficient.
See www.odl.com for more information.*

Raise, Lower & Tilt—No Dusting!

Privacy and Light Control

With the blinds lowered, you control the amount of privacy and light coming into your home. With the blinds raised, you feature your grille door style. Looks and function with none of the cleaning and banging associated with traditional blinds. That's a triple win!

- Side operator raises, lowers, and tilts the blind.
- Triple-glazed design reduces heat transmission by up to 28%.
- Helps meet ENERGY STAR® requirements when used with an ENERGY STAR® certified door or sidelight.
- 20 YEAR GLASS SEAL WARRANTY
- Available in white 11/16" contoured grille.

Energy Efficient

Glass + grille + glass + blind + glass = energy efficient, sound dampening, privacy and light control, and the charm of contoured door grilles.

Blinds completely disappear into top valance when fully raised.

Ergonomic design principles place fingertip control within easy reach. Side operator raises, lowers, and tilts the blind.

Designed with Architectural Style
In Mind.

The look of a true divided light, with the energy efficiency of a single light. A mill finish grille between glass, and backing strips for a true wood muntin appearance.

Craftsman SDL

All Craftsman SDL are manufactured with our craftsman style grilles available in mahogany, oak, or white. All are available in Clear Low-E, Rain Low-E, and Micro-Granite Low-E. Select sizes also available in Blanca Low-E and Streamed Low-E.

Grilles Between Glass

Standard Grille - 5/8" (GBG) or
 Wide Grille - 7/8" (GBG78)

Now available in Black and
 Two-Tone Bronze/White

Standard and Wide Grilles offer the broadest range of applications in our Grilles Between Glass products. Equally at home on your entry, side, or patio door; sidelights; and transoms, Standard and Wide Grilles offer a clean look at a price that won't break the bank. These grilles come in six distinct finishes.

Between Clear or Low-E Glass 

5/8" Grille (GBG) or 7/8" Grille (GBG78)

Available in White, Tan, Champagne, Black, Bronze, and Two-Tone Bronze (exterior) / White (interior)

Clear Doorglass & External Grilles

When you want the view and nothing but the view, Clear Glass is your answer. It is an option that works equally well from your entry door to your patio door. Offered in standard 6/8 and 8/0 door sizes, the breadth of options for doors, sidelights and transoms means choices that fit your home.

When you need the basics, our External Grilles with Clear Glass offer you a wide range of styles and choices. External Grilles are offered in finishes to complement stained or painted doors. Grilles are available for doors and sidelights.

Severe Weather Doorglass

**Designed for Security.
Engineered for Strength.**

ODL severe weather doorglass is designed for hurricane-rated doors, especially for homes in wind-borne debris regions or high-velocity hurricane zones (HVHZ). The severe weather products meet wind-borne requirements in areas where wind speeds can exceed 180 mph, Design Pressure (DP) ± 66 psf, and wind and missile impact code requirements. The flat profile frame laminated severe weather door lights are certified to meet Florida Building Commission codes. Please go to www.odl.com for the most updated product certifications.

Florida Wind-Borne Debris Region for Risk Category II Buildings

Texas First Tier Coastal Counties

Impact-Resistance Laminated Glass

ODL Decorative Doorglass, Blinds and Grilles are sealed between impact-resistant laminated glass on the exterior, and tempered safety glass on the interior.

Flat Frame Profile Offers Strength and Quality

- Flat profile for a wider range of architectural applications
- Low 3/8" profile
- Longer screws reduce potential strip out
- Flat screw hole covers install flush to frame
- White powder coat finish on aluminum frame can be painted
- No shop-related Dow 995 application required
- Meets Florida Severe Weather requirements ± 66 DP
- Product certification information available under:
Florida Building Code approval FL14935.1, FL14935.2, FL14935.3, FL14935.4
Texas Department of Insurance approval DR-557, 625, 633, 634, 691, 692

Added Value of Noise Suppression

ODL Severe Weather Doorglass provides you with a quieter solution over storm shutters: they carry a sound transmission class rating of 37 dB for a level of sound suppression that is welcome year round.

Third party test reports are available at www.odl.com/techinfo_productperformance_doorglass_stc.htm

Missile Impact Tested

The Level D missile impact test involves firing an 8-foot long 2" x 4" at 50 feet-per-second at designated spots on the doorglass and door slab. The entire unit must remain intact through 9,000 pressure cycles, and also pass water-infiltration, structural loading, and forced air-infiltration tests.

See the *Missile Impact Test video* at www.odl.com/videos_doorglass_missiletesting.htm

Our Doorglass Frames Solve Your Problems

Doorglass Frame Leadership

For nearly 70 years, ODL has been manufacturing top-rated doorglass framing systems. ODL understands the importance of material selection in the manufacturing of high-quality products, and for doorglass framing. That means choosing the right resin to prevent unwanted cracking, warping and deformation. Material selection is driven by a combination of factors, including cost targets and performance requirements. Rigorous third party testing also assures that product performance meets design intent. ODL frames are tested to meet the North American Fenestration Standard (NAFS) for windows, doors and skylights, including structural integrity, resistance to water penetration, air leakage and forced entry. ODL products not only meet this standard, but they surpass it due to state-of-the-art manufacturing. ODL doorglass frames rival the competition, particularly in the area of sealant performance and include patented features.

Doorglass Frames Enhance Entry Door Performance

The long-term performance of an exterior door with a glass insert is dependent upon the doorglass framing system. Just as every building and remodeling project is different, so are specialized doorglass framing systems. Quality frames are both durable and flexible to meet distinct market needs and are available in several different visual finishes. They are manufactured with high-performance resin, which requires less long-term maintenance, and they are engineered for quick installation for a variety of door applications.

Slam Testing

Water Testing

Quality Frame Material

ODL Doorglass Frames Solve Problems

ODL offers framing system solutions for a wide variety of applications. Industry wide, builders, remodelers and homeowners deal with the everyday problems caused by the wrong frame application. Quality problems such as squeeze out, scalloping, corner flare and yellowing are everyday occurrences. Couple these with misaligned screw hole covers and poor energy efficiency and the frame you're currently using may be causing you additional time and effort. ODL has the solution to your needs.

Squeeze Out

Corner Flare

Frame Yellowing

Resolve™ Sealant

Meet the game-changer in glazing seals for doors.

- Improves installation ease and success
- Eliminates messy ooze-out
- Reduces service and warranty issues
- Provides you with a premium product and competitive advantage

ODL, a leader in frame-and-seal technology, is changing the game with the launch of our innovative Resolve™ Sealant. No other building products manufacturer has put such a stake in the ground, but we're resolved to innovating sealant technology and making superior products for you. Resolve is the result of a state-of-the-art automated application process that creates a consistent foam seal frame after frame.

Join us, and resolve to be part of the change.

Frame Materials

We take great pride in offering a wide variety of frame materials and profiles to meet every customer's needs. Our framing systems offer everything from maintenance-free to high-heat resistant to architecturally-correct solutions. We have the frame you need to reduce quality issues and gain greater customer satisfaction.
